

PSA Hub, with DocGen included.

PSA Hub runs your practice — time, expense, projects, billing, WIP, resourcing, forecasting — natively on Microsoft Dataverse, in your own tenant. Invoices, statements and engagement documents are part of that job, so PSA Hub carries our DocGen document engine with it: take both together and Year 1 of the DocGen platform is included, and the DocGen deployment fee is waived outright.

WORKED EXAMPLE — 40 USERS ON PSA HUB PRO

LINE	STANDALONE	BUNDLED
PSA Hub — 40 users × \$55 / user / month × 12	\$26,400	\$26,400
DocGen platform — one production environment	\$8,500	Year 1 included
DocGen deployment and onboarding	\$6,500	Waived
Year 1 total	\$41,400	\$26,400
Year 2 onward, per year	\$34,900	\$31,900

WHY THE WAIVED DEPLOYMENT IS A REAL SAVING

One environment, set up once

DocGen's deployment covers the Azure environment, the Entra app registration and the Key Vault wiring. In a bundle, that exact work happens during the PSA Hub implementation — so the separate DocGen deployment fee has nothing left to pay for, and we don't charge it.

One platform bill from Year 2

From Year 2, bundled DocGen bills at \$5,500 per year alongside your PSA Hub subscription — one renewal, one support relationship, one Dataverse tenant holding both products' data.

The bundle is always PSA Hub carrying DocGen — a document engine belongs inside the system that raises the documents. DocGen remains available on its own at its published pricing; the included Year 1 and waived deployment apply only alongside a PSA Hub subscription.

TERMS

- PSA Hub: minimum 15 users, billed annually. Core \$35 / Pro \$55 per user per month.
- PSA Hub implementation is scoped and quoted separately (from \$18,000); it is not part of the figures above.
- Bundled DocGen: Year 1 platform included, deployment waived; bills \$5,500 per year from Year 2. One production environment, every template in it — further production environments at published DocGen pricing.
- DocGen standalone is \$8,500 per production environment per year. DocGen and SSS DMS together in one environment are \$14,500 per year.
- Azure infrastructure runs in your own subscription and is billed to you directly by Microsoft.
